Millionaires of the Wall Street Crowd Drop Out for the Present.

RECENT RAILWAY REPORTS

CUT IN MAINTENANCE TO IN CREASE NET EARNINGS.

New York, Sept. 29.-The tendency prices to settle to a dead level was still further manifested in the stock marke oday. The professionals confined them selves to what they call "in and out" dealings. There were intervals of sev eral minutes during the afternoon when transaction was reported from the floor of the exchange-a condition of dull-Bess rarely seen. The stagnant condition convinced the doubtful ones that the wealthy capitalists who were credited with responsibility for the activity of the stummer dealings were abstaining from dealings in stocks for the present. This fact constituted the news of the market. Nothing else received much attention, nor was there anything, in fact

Which seemed to merit it. Published reports that Harriman ha been in consultation with a medical spe-cialist were seized upon by the room trad-ers in an attempt to make food for a speculative movement. The small effec-produced was evidence of the lack of baproduced was evidence of the lack of ba-sis for reports of serious impairment of Mr. Harriman's condition. That the sus-taining force of the stock market during much of the past summer has been cen-tered in the power of the Harriman name there can be no doubt. So much was this the case that disquieting considerations of how much rested on the welfare of one life often crept into the market discussion.

The appearance in succession of the annual reports of the great railroad systems have a rather chastening effect upon enthusiasm in the speculation, although they relate circumstances now become past history. As an example of the depths from which complete recovery must be made heaven the recovery cry must be made, however, the report covering the late fiscal year still have force. The progress of that recovery is illustrated in the August net earning how coming to hand.

For instance, the Southern Railway system, in spite of a falling off of 16.7 per cent in gross earnings compared with August of last year, has established at actual in rease in the net revenue of no less than 23.83 per cent. This result was obtained by a drastic cut of 28 per cent. in the operating cost. So strong a con-trast, even considering the comparison with last year's period of enforced extravagance in cost of operation to accommodate pressure of traffic, does no escape criticism, as reflecting a prossible N. Y. Central ... 1.200 403
starvation of maintenance expenditures.
The case is shown in magnified form in the Southern Railway showing, but the Lendency is fairly representative. Some repressive influence on the speculation Pacific Mail ... 1200 126
